ABOUT COMPANY

Jitegemee Holdings Company (JHC) Ltd is a full-service mining company with corporate offices in Dar es Salaam, Tanzania, East Africa, and its coal mining sites in Songea, Ruvuma Region in Mbinga District and salt site in Kilwa District Lindi Region. Jitegemee Holdings Company (JHC) Ltd was fully registered under BRELA on 17th March 2020 with registration number 141293281. The company was established, owned, and operated by a Tanzanian institution with the ultimate goal of developing the country to its maximum potential.

The main aim of establishing the company was to conduct a business that involve the transaction of different types of mineral products which will make the company be a self-sufficient sustainable company on its operations and conducts.

ABOUT COMPANY

The company started its first project on coal mining at Ntunduwaro village, located in the Mbinga district in the Ruvuma region a geology area named Northern Ngaka around May 2021. This project was operated with 4 licenses (ML) of which, when reaching the financial year of June 2022, the project had a total turnover of Tshs. 15 billion.

As a mining company, JHCL brings together prominent professionals from diverse fields of mining professionals such as geologists, mine engineers, environmental scientists, quality control professionals, business development, legal professionals and corporate leadership to generate informed analyses and responses to contemporary challenges in mining and energy sector.

ABOUT COMPANY

With a dedicated and competent workforce at the mining site and at the corporate office, the company has a key clientele base that includes small and large energy consumers such as Dangote Industries Limited, Lake Cement Company Limited, Mbeya Cement Limited, Maweni Limestone Limited, Goodwill Uganda Ceramic Company Limited, Keda Kenya Company Limited, among others.

Our clients range from small to large energy consumers and are major manufacturing and industrial processors among private companies, government agencies (Local Government Authorities), and foreign investors. JHCL strives to support the large energy consumers in the Tanzanian market through timely delivery, innovative advisory, and support services.

VISION & MISSION

We cherish and protect our brand image, customer experience, and stakeholders' value Optimization.

OUR SERVICES

Sale of Coal and other minerals

Coal is and shall remain one of the pioneering mineral products of Jitegemee Holdings Company Limited. The company shall mine and sell coal as an alternative source of heating energy to different customers in the local and international markets. Bituminous type of coal produced by Jitegemee Holdings Company Limited has a myriad of other uses including in cement production, carbon fibres and foams, medicines, tars, and for home and commercial use as an alternative source of heat and power.

Coal will continue to provide a major portion of energy requirements in the United Republic of Tanzania for at least several decades and for this reason, it is important that JHCL extracts its coal resources efficiently, safely, and in an environmentally responsible manner.

In 2023, JHCL is looking forward to starting its mining and distribution of its salt product.

OUR SERVICES

Research & Mining Technology Services

JHCL shall offer mining research and technology advisory services in the mining industry. Mining will continue to be a major economic activity in the United Republic of Tanzania for at least the next several decades. It is important that accurate information describing the amount, location, and quality of the mineral resources and reserves be available to fulfill the ease of their economic utilization

However, with the advent of Information Communication Technology (ICT), which later can be utilized to enhance the economic utilization of the existing minerals. The Research and Development department focuses on the needs and priorities in the areas of mineral resources and reserve assessments, digitalization, mining and processing, transportation of minerals, and mineral utilization

AWARDS

JHCL is very proud of achieving the following awards and recognitions;

Mining Commission

Second Runner amongst small-scale miners with respect to the contribution of Government revenues under the building, Industrial, and energy Minerals Category in February 2022.

Tanzania Revenue Authority

Large Tax contributor in financial year 2021/2022 during Taxpayers appreciation day November 2022.

CORPORATE SOCIAL RESPONSIBILITY (CSR)

Community Engagement

As a Mining company, we connect with the communities where our employees live, work, and community around our mining operations. Through strategic nonprofits in these communities, we foster meaningful partnerships to help drive change by focusing our resources on the environment, equity, and education.

JHCL provides charitable contributions to the poorer communities near its mining operation at Mbuyura and Ntunduaro villages in Mbinga District Ruvuma Region.

HOW WE WORK

Coal Mining Technologies

1

Surface mining of coal requires areas of land to be temporarily disturbed, which raises a number of environmental challenges. As coal mining is only a temporary use of land, a rehabilitation or reclamation plan is designed for each mine covering the period from the start of operations until when mining has finished

As per our guiding core values, Jitegemee Holdings Company Limited shall always treat and attend to its customers in a well-respected, served, and welcoming manner in both local and international markets. The company intends to keep expanding its market and keep crossing the borders of Tanzania and Africa in general, so as to keep selling the country's quality products and make it a reliable produce in the world market.

HOW WE WORK

Coal Mining Technologies

2

As of January 2023, Jitegemee Holdings Company has already set a record by transporting a total of 25,000 and 55,000 Tonnes of coal to DRC and Spain, respectively.

By March 2023, the company has managed to sell a total of 735,437.26 Tonnes of its coal mineral in the local and international market, particularly in Eastern and Central African countries including Kenya, Uganda, Burundi, Rwanda, and the Democratic Republic of Congo, and Spain in Europe.

HOW WE WORK

3

Equipments

For effective coal mining operations, the company uses advanced equipment that uses high technology. The company uses different equipment by either purchasing or renting them to facilitate the mining activity.

4

Coal production

The mining activities in the mining site officially started on 25th May 2021 and from then up to March 2023, the company has set its production record of having an average production of 2500 – 3000 Metric Tons of coal per day, using the available equipment. By March 2023, the company has set a production record of having a total production of 879,454.18 Metric Tons of coal, that were mined using our current mining license.

HOW WE WORK

5

Manpower

Jitegemee Holdings Company Limited is made up of five (5) Members of the board of directors, including the managing director as well as four (4) heads of different departments. In effecting this project, the company employed several staff with different skills to perfect this project. The company has a total of 82 workers of which thirteen (13) workers are stationed in Dar es Salaam, the headquarters office, and 69 of the workers are stationed at the mining site. Also, the company has a total record of 41 students who were fresh from the university and worked for the company as interns and they were here to learn and add skill set to their profession.

HOW WE WORK

6

Market size and total sales

We produce quality thermal coal with minimal Ash content, high Calorific Value, low moisture, and Low- Sulphur, which is acceptable for various industrial users and power plants. The company is also doing special coal research (expanded coal utilization) to produce clean and carbonized coal briquettes for domestic and institutional use for cooking purposes which is very economical compared to other energy sources.

The company began selling its coal mineral in June 2021 until March 2023, we have set our sales record by selling 735,437.26 Tons of coal in our local and international markets. In the year 2023 JHCL plan to start producing coal briquettes, a special product for domestic use in addition to that, we have salt production, also the company owns other mineral licenses such as Nickel, and gypsum mining sites all of them expect to commence soon.
